

Moving reverie -
a luxurious time
of musing,
meditating, moving
and expressing
our living
dreaming capacity.

In this intensive,
we allow
time and space
to enter and open
our hearts and
our attention,
into the deep
fruitful dark womb
of the Earth,
and the vastness
of the generative
imaginative cosmos.

SUSAN HARPER

HEART OF MOVING REVERIE

APRIL 23-27, 2010
NEW YORK CITY, NY

This is a call to fall
into the well of origin,
to rise with an original
dance of individuality
that has the flavor
of risk, vivid
vulnerability,
and passionate
aliveness.

We are participant
players in the
heart of creation
shaping a
shared reality,
and creatively
participating
in a contemporary
culture
of awakening.

This is a time of letting go, shedding old skin realities and cultural spells, AND a time of receiving inner inspiration connected to planetary wisdom, and the seeds gestating in your human heart and soul that are ready for this time of evolutionary change.

We are dwellers on the threshold—hovering on the cusp between nothing and something, - listening, expectant, available for something to emerge that has never happened before, and will never occur in that way again – like the next breath, sense impression, poetic or movement articulation.

WHAT WE WILL DO

In deep long movement dives, we breathe, slow down, sound, listen, feel, rest into spacious silence, and deepen our capacity for fluid grounded embodiment of our creative envisioning.

Inspire our human existence with the intelligent forces of all the elements: air, fire, water, earth, and space.

In movement and reverie, we explore our night and day dreams. Exploring dreams opens creative channels, broadens habitual perceptions, and brings insights to elaborate magic in the waking dream we call our life.

Welcome our own and each other's creative expression flowering into Life.

SUSAN HARPER has been teaching and contributing to Continuum since 1975.

She is the developer of Em'ceans and Sensations Trainings, Dreamtime Gatherings, and with Hubert Godard co-develops Portals of Perceptions.
